Update...

“Yesterday I had a Dental Assistant who went into a severe allergic reaction with her throat closing. I didn’t panic and kept cool knowing I had taken your course in Emergencies and was capable of dealing with it. I activated the Emergency Rescue system you taught and it went by the book. Afterwards her Physician mentioned to her that I had saved her life.”

-Simon Cherif, DDS (Pedodontist, Queens, N.Y.)

“Excellent Lecture. I thought I knew more but this lecture got me thinking about ways to change the way I perceive emergencies and how I act.”

“During and after taking Dr. Pompa’s course on Medical Emergencies, I realized how easy it is to forget these all important and life saving skills. He not only presents the latest emergency protocols, but did so portraying emergency scenarios in a multimedia fashion. This along with audience participation, and the use of live demonstrations, totally engaged all the attendees. I now feel confident should a medical crisis occur in my practice or home. Thank you!”
