- During and after taking Dr. Pompa’s “Update on Medical Emergencies”, I realized over the past 25 years how easy it was to forget the all-important and potential lifesaving skills. Dr. Daniel Pompa not only presented the latest emergency protocols, but did so by portraying scenarios in a multimedia fashion. This along with audience participation, and use of live demonstrations, totally engaged all that were present. I now feel confident should a medical emergency occur in my practice or at home. Thank you Dr. Pompa.

- After attending Dr. Pompa's course on Medical Emergencies I came back feeling considerably more confident to handle almost anything. Dr. Pompa was able to clearly demonstrate what the medical emergency diagnosis was through the patient's signs and symptoms, and what the treatment should be through the use of movie scenes and popular music. We were also instructed on how to set up our own Emergency Kits using color coding. This should be a required course for all dentists, and their staff, annually.
